| S \rightarrow VP NP | (0.4) |
| S \rightarrow NP VP | (0.6) |
| VP \rightarrow V | 0.3 |
| VP \rightarrow V NP | 0.3 |
| VP \rightarrow V PP | 0.25 |
| VP \rightarrow V NP PP | 0.15 |
| NP \rightarrow Pronoun | 0.1 |
| NP \rightarrow Det Noun | 0.2 |
| NP \rightarrow Det Adj Noun | 0.2 |
| NP \rightarrow Noun | 0.4 |
| NP \rightarrow NP PP | 0.1 |
| PP \rightarrow Preposition NP | 1 |

Bottom Up parsing Table

| Stack | Input | Action |
|------------------------------|---------------------------------|---|
| S | I saw a man with a Telescope | Shift |
| \$i | saw a man with a telescope | Reduce ($P_s \rightarrow i$) |
| \$P _{nom} | saw a man with the telescope \$ | Reduce ($NP \rightarrow P_s$) |
| \$NP | saw a man with the telescope \$ | Shift |
| \$NP saw | a man with the telescope \$ | Reduce ($V \rightarrow \text{saw}$) |
| \$NP V | a man with the telescope \$ | Shift |
| \$NP V a | man with the telescope \$ | Shift |
| \$NP V Det | man with the telescope \$ | Shift |
| \$NP V Det man | with the telescope \$ | Reduce ($N \rightarrow \text{man}$) |
| \$NP V Det N | with the telescope \$ | Reduce ($NP \rightarrow \text{Det}$) |
| \$NP V NP | with the telescope \$ | Shift |
| \$NP V NP with | with the telescope \$ | Reduce ($P_s \rightarrow \text{with}$) |
| \$NP V NP Prep | the telescope \$ | Shift |
| \$NP V NP Prep the | telescope \$ | Reduce ($N \rightarrow \text{telescope}$) |
| \$NP V NP Prep Det | telescope \$ | Shift |
| \$NP V NP Prep Det telescope | \$ | Reduce ($N \rightarrow \text{telescope}$) |
| \$NP V NP Prep Det N | \$ | Reduce ($NP \rightarrow \text{Det N}$) |
| \$NP V NP Prep NP | \$ | Reduce ($PP \rightarrow \text{Prep NP}$) |
| \$NP V NP PP | \$ | Reduce ($NP \rightarrow NP PP$) |
| \$NP V NP | \$ | Reduce ($VP \rightarrow V NP$) |
| \$NP VP | \$ | Reduce ($S \rightarrow NP VP$) |
| \$S | \$ | Accept |

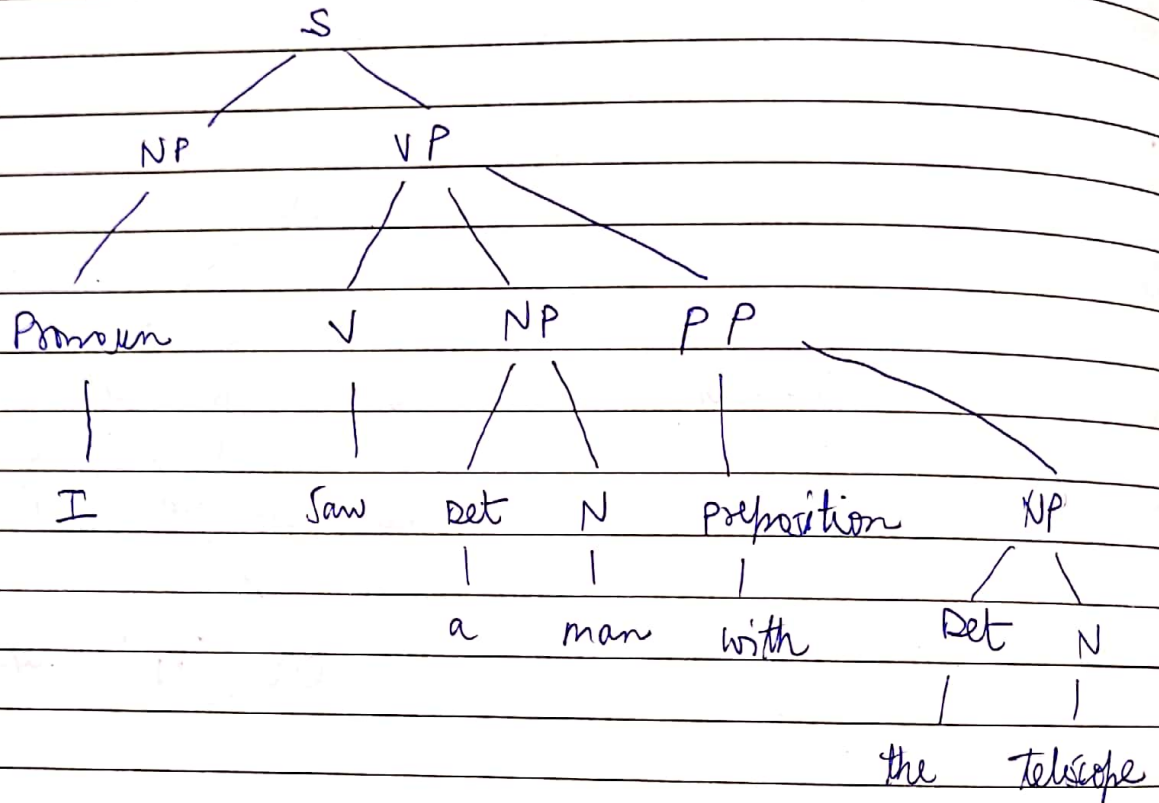

The parse Tree is as follows:-

Derivation:

$S \Rightarrow NP VP \Rightarrow \text{Pronoun } VP \Rightarrow I VP \Rightarrow I V NP$
 $\Rightarrow I \text{ saw } NP PP \Rightarrow I \text{ saw Det } NP PP \Rightarrow I \text{ saw } a NP PP$
 $\Rightarrow I \text{ saw } a \text{ man } PP \Rightarrow I \text{ saw } a \text{ man } \text{Prepositional } NP$
 $\Rightarrow I \text{ saw } a \text{ man with } NP \Rightarrow I \text{ saw } a \text{ man with}$
 $\text{Det } N \Rightarrow I \text{ saw } a \text{ man with the the } N \Rightarrow I$
 $\text{saw a man with the telescope.}$

The second parse tree will be:-

Derivation For Second Tree :-

$S \Rightarrow NP VP \Rightarrow \text{Pronoun VP} \Rightarrow I VP \Rightarrow I V NP PP \Rightarrow I \text{ saw } NP PP$
 $PP \Rightarrow I \text{ saw Det } N PP \Rightarrow I \text{ saw } a N PP \Rightarrow I \text{ saw } a \text{ man } PP$
 $PP \Rightarrow I \text{ saw } a \text{ man preposition NP} \Rightarrow I \text{ saw } a \text{ man with NP}$
 $NP \Rightarrow I \text{ saw } a \text{ man with Det NP} \Rightarrow I \text{ saw } a \text{ man with the N}$
 $N \Rightarrow I \text{ saw } a \text{ man with the telescope.}$

Probability of First Tree

$S \Rightarrow NP VP \quad (0.6)$
 $NP \Rightarrow \text{Pronoun} \quad (0.1)$
 $\text{Pronoun} \Rightarrow I \quad (0.5)$
 $VP \Rightarrow V NP \quad (0.3)$
 $V \Rightarrow \text{saw} \quad (0.4)$

NP \Rightarrow NP PP (0.1)

NP \Rightarrow Det N (0.2)

Det \Rightarrow a (0.6)

N \Rightarrow man (0.4)

PP \Rightarrow Prep NP (1)

Prep \Rightarrow with (0.9)

NP \Rightarrow Det N (0.2)

Det \Rightarrow the (0.4)

N \Rightarrow Telescope (0.02)

$$\text{Probability} = \prod p_i = 2.488 \times 10^{-8}$$

Probability For Second Tree :-

S \Rightarrow NP VP (0.6)

NP \Rightarrow known (0.1)

Pknown \Rightarrow I (0.5)

VP \Rightarrow V NP PP (0.13)

V \Rightarrow saw (0.4)

NP \Rightarrow Det N (0.2)

PP \Rightarrow Proposition NP (1)

Det \Rightarrow a (0.6)

N \Rightarrow man (0.4)

Proposition \Rightarrow with (0.9)

NP \Rightarrow Det N (0.2)

Det \Rightarrow the (0.4)

N \Rightarrow Telescope (0.02)

$$\text{Probability } P_2 = \prod p_{i2} = 1.244 \times 10^{-7}$$

As the second tree has a higher probability $P_2 > P_1$, the second derivation is much more likely to occur.
